

Observer Pattern

10 December 2023 20:22

It's essentially about

PUSH | PULL

This is known as observer pattern.

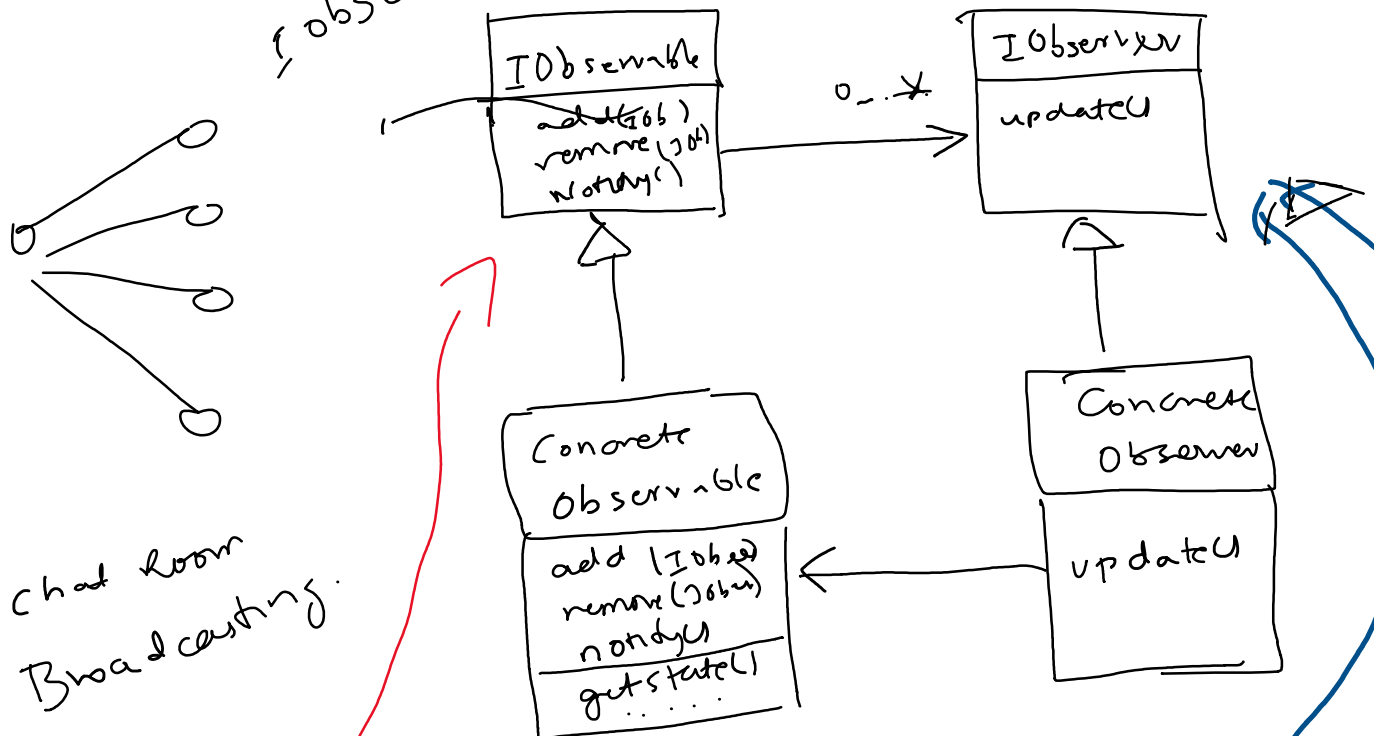

① Before pushing need to register to the observer.

① Defines one to many relationship

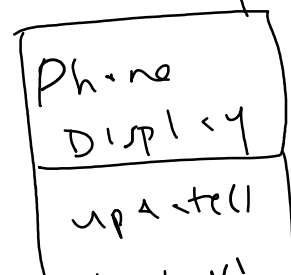

UML DIAGRAM
observer

→ has on

Ex:

~
 notify
 get Tempuesh
 re

display

WS st = new W.
 PD disp = new P

st.add(disp
 st.notify();
